FEIN Turbo Vac III 9-77-25

Operating Instructions

ATTENTION: READ BEFORE USING

- Make sure that the voltage nameplate of the device corresponds to the voltage of your network. The plug has to be protected with a minimum of 20 Amps.
 IMPORTANT! THE VACUUM CLEANER IS SUPPLIED FROM THE FACTORY WITH A SUPPLY CABLE WITH A GROUNDED PLUG. IT MUST ONLY BE CONNECTED TO AN APPROVED GROUNDED SOCKET.
- Before performing any maintenance work, unplug the vacuum from the outlet.
- WARNING! *EXPLOSION AND FIRE HAZARD!* Never vacuum flammable fluids or gas, oil, alcohol, solvents, etc. Do not operate near flammable fluids or gas. Never vacuum warm fluids or materials at more than 140° Fahrenheit (60° Celsius), such as burning cigarettes, ashes, glowing coals, etc.
- WARNING! DO NOT VACUUM HAZARDOUS/CARCINOGENIC DUST UNLESS THE OPTIONAL HEPA FILTER IS INSTALLED.
- Do not pull the vac by the cable and do not damage the insulation on the cable. If the cable is damaged, it must be replaced immediately.
- Always keep the filter cartridge clean so the vacuum cleaner operates properly.

ASSEMBLY INSTRUCTIONS

To attach the wheels, press the wheel posts into the four holes provided.

a) Connect the vacuum end of hose 2 to the receptacle by pressing in. In order to remove the hose, slightly turn and pull the hose out simultaneously.

b) Connect the handle 4 with the hose end 3 by pressing in. The handle is provided with a suction force reducing device. Turn in the dirrection of the arrow. In order to get full suction pressure, keep the regulating device closed.

c) Tube extension pieces 5 and accessories can be connected by pressure. For disassembling, slightly turn both parts and draw apart.

SUCTION OF DRY DUST AND DIRT

The cloth filter that came with your FEIN Turbo III will contain extracted dust, 5.0 microns in size and larger. If picking up fine dust, you will need to use a pleated filter cartridge and paper bag, which can be purchased as a (FBK-3) kit . (see page 6 for kit contents).

- a) To install the optional filter cartridge \widehat{G} place the turn screw \widehat{I} inside the flange \widehat{K} . Place the filter cartridge on the float cage then put the flange assembly on the bottom of the filter. Turn the screw quarter turn to lock the filter on.
- b) In order to remove the filter cartridge turn the screw (1) quarter turn counterclockwise and pull out the filter cartridge.

Do not use vacuum without a filter. Use the cloth filter that came with your vacuum, or a pleated filter. Do not use both at the same time. Failure to use a filter when dry vacuum cleaning will damage the motor. NEVER USE VACUUM CLEANER WITH A WET FILTER CARTRIDGE FOR DRY VACUUM CLEANING. It quickly becomes clogged and unusable.

c) Fix the optional paper dust bag (H) to the inner side of the tube-connection in the receptacle: fig.c. and d. When using this paper dust bag the dirt can be removed more hygienically and the life of the filter cartridge will be increased. The paper dust bag (H) should be used with the filter cartridge, it should NEVER be used by itself or with the cloth filter.

SUCTION OF DRY DUST AND DIRT (continued)

ATTENTION: If suction pressure decreases, replace the paper dust bag (H) with a new one. From time to time the filter cartridge (G) should be cleaned with a soft brush, ensuring longer life and higher performance.

SUCTION OF FLUIDS

a) First, remove any dirt and dust residue from previous cleaning operations from the container. Remove the cloth filter or the cartridge filter G and replace it with the anti-foam filter R. DO NOT USE THE CLOTH FILTER, THE CARTRIDGE FILTER OR THE PAPER DUST BAG DURING THE SUCTION OF FLUIDS.

b) In order to guarantee enough air flow, it is recommended that accessories not be completely immersed into the fluids.

c) When the fluids have reached the highest permitted level in the tank, the float regulator (F) automatically blocks suction and the motor gets noisier. Switch the vacuum off IMMEDIATELY, pull out the plug, remove the suction head from the tank and empty the tank.

9-77-25 TURBO III VAC ACCESSORIES

<u>Item</u>	Part Number	Description
1	921001AK13	Extension tube (order 2)
2	921085AK13	Handle
3	921081CD13	Floor nozzle
4	921003AK13	Upholstery nozzle
5	921002AK13	Brush
6	921004AK13	Crevice tool
7	90204200	Anti-foam filter
8	TII1MCRN	1Micron filter
	TIIHEPA	Hepa filter 0.3 microns
9	TII3002	Flange filter
10	TII3001	Turn screw-filter
11	913064AGA6	Cloth filter
12	913048K01	Paper dust bag- 3 pack
13	530300AA41	Waste pipe hose
14	921086AA13	Y connector with cap
15	921087AK13	Y cap
16	3916054A089	Hose cradle
17	526300AA13	Basket and strap

Kits:

FBK-3

	1	
consists	913048A01 Paper dust bag	
of 1 each	TII3002 Filter flange	
	TII3001 Flange turn screw	
DW3	921001AK13 Extension tube (2)	
consists	921004AK13 Crevice nozzle	
of 1 each	921085AK13 Handle	
	902042000 Anti-foam filter	
	921081CD13 Upholstery nozzle	
	921081CD13 Floor nozzle	
	921002AK13 Brush	

TIIMCRN 1 Micron pleated filter

MAINTENANCE

After every use:

- Empty the tank (dirt, dust, and fluids).
- Never leave fluids in the tank. This could cause damage to the tank.
- After vacuuming fluids, it is necessary to dry extension pieces, tube
 and motor parts by running the vacuum a few minutes, after having
 emptied the tank.
- Always keep a reserve of paper dust bags and filter cartridges, so that the vacuum is always ready for use.
